Family Directory

Family List

Tooltip Description Displayed When Adding a Family As Unregistered Revised to Improve Clarity

To help users understand the action the system takes when they add a new family as unregistered, we revised for clarity the message displayed when the **As Unregistered** option, shown below, is selected:

ParishSOFT Family Suite v5.0.21 Release Notes__last updated January 23, 2024

Religious Education

Reports

Member Email Replaces Family Email in Volunteers Section of the Standard Roster Report

In the **Volunteers** section of the **Standard Roster** report, the **Email** field now shows the email address pulled from the volunteer's Member record in Family Directory. Previously, this field showed the email address pulled from the volunteer's Family record. To reflect this change, the label on the field was shortened to **Email**, as shown below:

Note that in the **Students** section of the report, the email address shown for each student continues to be their family's email address. Therefore, the email address field remains appropriately labeled **Family Email**.

Added Ability to Hide/Show Unenrolled and Transferred Students in Attendance Reports

As shown below, we added a new option, labeled **Hide Unenrolled/Transferred Students** to the **Attendance Report** setup:

The **Hide Unenrolled/Transferred Students** option enables you to control the visibility of the names of unenrolled and transferred students in your attendance reports.

- When the option is enabled (the default), the generated attendance report does not include the names of students who either unenrolled or transferred (if applicable) from each listed class.

- When the option is disabled, the generated attendance report includes the names of students who either unenrolled or transferred (if applicable) from each listed class. Select this option if you want to view the names of students previously enrolled in a class.

The enabled/disabled setting selected also applies to the **Blank Attendance** and Print **By Date** versions of a report.

Issues Resolved in Version 5.0.21

Religious Education

Attendance

Fixed: Searches for Classes With an Apostrophe in the Name Cause an Error

On the **Attendance** page, the system generates an error when the user tries to search for a class that has an apostrophe in its name.

Development Manager

Batches

Fixed: Contributions Posted by Batch to Non-Diocesan Organizations Missing from Batch Postings

Contributions posted to a batch are missing from its list of postings when a non-diocesan organization is selected for the **Development Organization** option (on the **Administration** tab on the **Settings** page).

Administration

Manage Staff

Fixed: Removing a Position from an Assignment Sometimes Causes an Error

The system sometimes generates an error when the user tries to remove a position from an assignment. Additionally, the system does not allow the user to add a position that was previously removed from an assignment back to the assignment. These issues were resolved.
