## What's New in Version 4.9.24

---

### Development Manager and Offering

#### Batches

##### [Giving History Now Accessible in All Areas Where Contributions and Pledges Are Viewed/Entered](#)

Previously, users with Lifetime Giving permissions could not view donors' giving history data because the **Lifetime Giving** button was disabled (grayed out) in the following areas:

- **Batches > Postings**
- **Pledges > Details**
- **Contributions > Details**

In each of these areas, the Lifetime Giving button is now enabled so that users with the appropriate permissions can view donors' giving history data.

### Issues Resolved in Version 4.9.24

---

### Development Manager and Offering

#### Batches

##### [Fixed: Batch List Export File Empty After the Search for a Batch Using the BatchID Value](#)

After the user searches for a batch using the **BatchID** value and then runs a **Batch List** export, the exported file contains no records.

##### [Fixed: Quick Posting Process Ignores Enabled Setting for 'Fund Requires Pledges'](#)

The Quick Posting process incorrectly allows users to post contributions to a fund that requires pledges for donors who have no pledge to the fund.

#### Pledges

##### [Fixed: Only Diocesan-Owned Records Show a Family Group Value in Directory Search Results](#)

In the Directory Search results for pledges, the only records with a value in the **Family Group** column are those owned by the diocese.
