Issues Resolved in Version 5.0.14

Religious Education

Students & Volunteers

151515 Fixed: Filter and Search Functions Do Not Work Correctly After the User Switches Organizations

Users with access to multiple organizations report that after they change organizations, the search and filter functions on the **Students & Volunteers** grid do not work correctly. These functions either generate an error or return no results—even though the data indicate otherwise. Additionally, after the user applies a filter, the **Reset** and **Apply** buttons are sometimes missing.

150499 Fixed: Students Grid Shows Information for Previously Enrolled-In Class Instead of Current Class

If a student transfers from one class to another, the **Students** grid shows information for the previously enrolled-in class instead of information for the newly enrolled-in class. To deliver more relevant content to users, the grid was updated to show information for the class each student is now enrolled in.

Classes & Sessions

151515 Fixed: Filter and Search Functions Do Not Work Correctly After the User Switches Organizations

Users with access to multiple organizations report that after they change organizations, the search and filter functions on the **Classes & Sessions** grid do not work correctly. These functions either generate an error or return no results—even though the data indicate otherwise. Additionally, after the user applies a filter, the **Reset** and **Apply** buttons are sometimes missing.

Attendance

150002 Fixed: Meeting Dates Shown for Deleted Classes on the Attendance Page

After a class is deleted, the individual meeting dates for the class continue to show on the **Attendance** page.

Development Manager and Offering

Integration

151704 Fixed: Donor Matching Process Between ParishSOFT Giving and Family Suite Needs Better Precision

Issues with the donor matching process are preventing matching family and member records in ParishSOFT **Development Manager** and **Offering** from being returned to **ParishSOFT Giving**. In some instances, the process finds no matches in **Development Manager** or **Offering** even though matching records exist.

Administration

Manage Staff

150312 Fixed: Organization Admin Permission Incorrectly Overrides Disabled Close Batch Permission

If **Close Batch** permission is not granted, a staff user should not be able to close batches even if they are configured as an organization administrator. **Organization Admin** permission should not override **Close Batch** permission if that permission is specifically not granted.
