What's New in Version 5.0.15

Offering

Home

Development Button Added to Reports Group on the Home Page

As illustrated below, we added a **Development** button to the **Reports** group on the Offering **Home** page:

Only staff users with **ParishSOFT DDM** and either **Development User** or **Development Admin** permission see this button. Clicking the button opens the **Parish Reports** page in **Development Manager** where users can view and generate parish reports for the selected organization.

Religious Education

Reports

'Show Student Notes' Option Added to Setup for Standard Roster Report

We added the **Show Student Notes** option to the setup for the **Standard Roster** report. With this option selected, you can generate rosters that includes content (if it exists) in the **Notes** field in each selected student's or volunteer's record.

Issues Resolved in Version 5.0.15

Religious Education

Reports

Fixed: Duplicate Parent Entries in Member & Family Details Report

The **Member & Family Details** report sometimes includes duplicate parent entries. The duplicate entries sometimes contain conflicting information pertaining to the parent-student relationship. For example, one entry may show the parent as the student's mother while the other entry may show the parent as the student's stepmother.

Administration

Suspense

Fixed: Member Updates to General Tab Through MOC Push Non-Requested Change to the SSN Field

When members submit a change through **My Own Church** to any field on the **General** tab in their record, the system pushes the change request—as expected—to administrative review. In review, however, the change appears as a request to add the text "enc" to the social security number field—even though the member requested no such change.
