What's New in Version 5.0.24

Family Suite API

Ministries

New Endpoint Added to the Family Suite API – Retrieve all Ministries for an Organization

A new endpoint has been added that will allow Users to query for and retrieve a list of all **Ministries** for their organization so that these ministries can be included in the Parish's external reporting and communications processes.

Data Fields returned will consist of:

- **ID**
- **Ministry Name**
- **Organization ID**

Note: If the specified 'organizationID' value that is passed to the endpoint is not a valid organization covered by the API Key, an error response is triggered.

New Endpoint Added to the Family Suite API – Retrieve all Ministers in a Specific Ministry

A new endpoint has been added that will allow Users to query for and retrieve a list of all ministers in a specific **Ministry** so that these members can be included in the Parish's external reporting and communications processes.

The process is facilitated by the API passing the specific 'ministryTypeID' value. Data Fields returned will consist of:

- **MemberDUID**
 - **Member First Name**
 - **Member Last Name**
 - **Member Email Address**
 - **Ministry Type ID**
 - **Ministry Type Name**
 - **Ministry Role ID**
 - **Ministry Role Name**
 - **Ministry Event ID**
 - **Ministry Event Name**
 - **Ministry Start Date**
 - **Ministry End Date**
 - **Trained**
 - **Sub Only**
- **Note:** If the specified 'ministryTypeID' value that is passed to the endpoint does not belong to an organization that is covered by the API Key, an error response is triggered.
